

ANDISHAN VASKAR

Colombo, Sri Lanka | +94 76 431 3127 | vaskarandishan@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Motivated Information Technology undergraduate at the Sri Lanka Institute of Information Technology (SLIIT), pursuing a B.Sc. (Hons) in Information Technology, expected to graduate in 2028. Proficient in Java, Python, and JavaScript with hands-on experience in HTML, CSS, MySQL, Spring Boot, and React. Experienced in designing and implementing academic projects covering inventory management, booking systems, and customer record management.

Strong foundation in Object-Oriented Programming (OOP), Data Structures and Algorithms, REST APIs, and version control using Git and GitHub. Familiar with both frontend and backend development, with a growing interest in full-stack development and artificial intelligence. Known for being self-motivated, detail-oriented, and effective in team collaboration, with a consistent focus on improving technical and problem-solving skills.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT)

2024 – Expected 2028

B.Sc. (Hons) in Information Technology | Specialization: Information Technology | Malabe, Sri Lanka

Relevant Coursework: Programming Fundamentals, Object-Oriented Programming, Database Management Systems, Data Structures and Algorithms, Web Application Development, Software Engineering

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

Web Development: HTML, CSS, Node.js, React

Backend Development: Spring Boot, REST APIs

Databases: MySQL, MongoDB, PostgreSQL

Tools & Platforms: Git, GitHub, Visual Studio Code

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Development Life Cycle (SDLC)

Areas of Interest: Artificial Intelligence (AI/ML), Full-Stack Development

PROJECTS

Bakery Management System

Academic Project | 2024

- Designed and developed a desktop/web-based application to manage bakery operations including order processing, inventory tracking, and customer management.
- Implemented a user-friendly interface that streamlined daily operations and reduced manual data entry errors.
- Enabled real-time stock monitoring and automated order updates to improve operational efficiency.
- Applied OOP principles and MVC design pattern to structure the codebase for maintainability and scalability.
- Technologies Used:** Java, HTML, CSS

Event Photography Management System

Academic Project | 2024

- Designed and implemented a full-cycle management system to handle photography bookings, client profiles, event scheduling, and photo delivery workflows.
- Developed features for tracking order status and ensuring timely delivery of edited photos to clients.
- Integrated a client management module to maintain detailed records and improve communication efficiency.
- Built RESTful API endpoints to connect frontend and backend components for seamless data flow.
- Technologies Used:** JavaScript, Spring Boot, MySQL

Tourist Management System

Academic Project | 2025

- Created a comprehensive management system for handling travel packages, customer registrations, and booking records for tourism services.
- Designed the system to provide information on both major cities and rural tourist destinations across Sri Lanka, enabling users to explore a wide range of travel locations.
- Designed a relational database schema to efficiently store and retrieve customer and package data.
- Used Spring Boot to develop a robust backend with well-structured REST APIs and MySQL for data persistence.
- **Technologies Used:** Java, Spring Boot, PostgreSQL

SOFT SKILLS

- Team Collaboration and Communication
- Problem-Solving and Analytical Thinking
- Self-Motivated and Continuous Learner
- Time Management and Attention to Detail

LANGUAGES

- **Tamil** — Native proficiency
- **English** — Basic proficiency (reading, writing, speaking)
- **Sinhala** — Basic proficiency
